LIMITED WARRANTY

LG Electronics warrants to the original purchaser (end user) that the cellular product and its enclosed accessories will be free from defects in material and workmanship, according to the following terms and conditions:

1. WHAT THIS WARRANTY COVERS:

- (1)** The limited warranty for the handset remains in effect for a period of 12 (twelve) months based on the date of purchase (except for the battery, where the Warranty Period shall be 6 months).
- (2)** The limited warranty extends only to the original purchaser (end user) and is not assignable or transferable to any subsequent purchaser/end user.
- (3)** During the warranty period LG or officially appointed service agent will repair or replace any defective product or parts thereof at its discretion.
- (4)** This limited warranty is applicable to the customer/end user that purchased the product from an official dealer in the United Kingdom.
- (5)** The purchaser (end user) must retain the original purchase invoice/till slip in order to enforce this limited warranty.

2. WHAT THIS WARRANTY DOES NOT COVER:

- (1)** Defects or damages resulting from the misuse of this product.
- (2)** Defects or damages from abnormal use, abnormal conditions, improper storage, exposure to moisture or dampness, unauthorized modifications, unauthorized repair, neglect, abuse, accident, alteration, improper installation, blown fuses, food or liquid spillage, acts of God and shipping damage.
- (3)** Breakage or damage to antennas unless caused directly by defects in material or workmanship.
- (4)** The cost of delivery or transportation of the product to the dealer or officially appointed service center will be borne by the purchaser (end user).

- (5)** Products received for repair by the dealer or authorized service center after the product warranty has expired.
- (6)** Products that have had the serial number removed or defaced.
- (7)** THIS LIMITED WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED IN TERMS OF MARKETABILITY OR FITNESS FOR A PARTICULAR USE. SPECIFICALLY THE COMPANY WILL ACCEPT NO RESPONSIBILITY OR LIABILITY FOR CONSEQUENTIAL, INDIRECT, INCIDENTAL AND SPECIAL LOSS OR DAMAGE CAUSED BY OR DUE TO FAILURE OF OPERATION OR MALFUNCTION OF THE PRODUCT, OR ARISING FROM THE USE OR INABILITY TO USE THE PRODUCT.
- (8)** Damage resulting from the use of non-LG approved accessories.
- (9)** Scratches and damage caused by normal use.
- (10)** Products used outside published maximum ratings.
- (11)** Consumables such as fuses.

Thank you for purchasing this LG U8120 handset. In the unlikely event that your handset needs to be repaired, please contact 3 Customer Services for information on how to return your handset for repair by dialing 0870.7330.333 or 333. Please have your IMEI number ready when you call (this can be found under the battery).

Welcome to your LG U8120 handset

User guides can be daunting things, can't they?
But don't worry, we've made this one as
simple as possible.

Your guide is designed to do two things.

First, there's an explanation on how to use your new LG U8120, so finding your way around the handset will soon become the second nature.

Then there's an introduction to the wide range of services offered, to make sure you get the best from them.

If all you want to do is power up and get going, that's fine.

Guidelines for safe and efficient use

Read these simple guidelines. Breaking the rules may be dangerous or illegal.
Further detailed information is given in this manual.

Emergency Services and Safety Precautions

- Do not allow battery to come into direct contact with an electric outlet or car cigarette lighter socket
- Do not pierce battery with sharp objects
- Do not drop or subject the phone to physical shock
- When the battery has reached the end of its life, dispose of it in accordance with environmental regulations. Do not dispose of your battery in household rubbish.
- Do not immerse in water
- Do not disassemble or modify the battery
- Stop using the battery if abnormal heat, odour, discolouration, deformation, or abnormal conditions are detected during use, charge, or storage
- Do not use damaged or deformed batteries. In the unlikely event of a battery leak, take care to keep the battery discharge away from your eyes or skin.
- If the leakage does come into contact with the eyes or skin, please wash thoroughly in clean water and consult with a doctor
- The earpiece may become warm during normal use. The handset itself may become warm while the battery is being charged
- Use a damp or anti-static cloth to clean the handset. Do not use a dry cloth or electrostatically charged cloth. Do not use chemical or abrasive cleaners as these could damage the phone
- Retain the cardboard packing supplied with this handset. It should be used if the phone has to be returned for service. This packaging can be recycled when no longer required
- Remember to make backup copies of all important data on your handset

Aircraft safety

In accordance with CAA regulations, you must switch off your phone on aircraft. Mobile phone signals can interfere with aircraft equipment. Follow the instructions given by airline staff at all times

Hospital safety

Switch off your phone in areas where the use of handsets is prohibited. Follow the instructions given by the respective medical facility regarding the use of handsets on their premises

General safety

- Observe 'Turn off 2-way radio' signs, such as those near petrol stations, chemicals or explosives, and turn off your handset
- Do not allow children to play with the handset, charger or batteries
- Do not use the handset where blasting is in progress
- The operation of some medical electronic devices, such as hearing aids and pacemakers, may be affected if a handset is used next to them. Observe any warning signs and the manufacturer's recommendations

Road safety

- You MUST exercise the proper control of your vehicle at all times. Give your full attention to driving
- Observe all laws in respect to the use of mobile phones when driving
- Pull off the road and park before making or answering a call where it is safe to do so. UK law prohibits the use of hand held mobile phones when driving
- You MUST NOT stop on the hard shoulder of a motorway to answer or make a call, except in an emergency
- Switch off your handset at refueling points and petrol stations, even if you are not refueling your own car
- Do not store or carry flammable or explosive materials near your handset
- Electronic vehicle systems, such as anti-lock brakes, speed control and fuel injection systems are not normally affected by radio transmissions
- The manufacturers of such equipment can advise if it is adequately shielded from radio transmissions. Consult your dealer and do not switch on the handset until it has been checked by qualified installers

Emergency Services and Safety Precautions

Vehicles equipped with an air bag

An air bag inflates with great force. Do not place objects, including either installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

Third party equipment

The use of third party equipment, cables or accessories, not made or authorized by LG, may invalidate the warranty of your handset and also adversely affect the handset's safety or operation.

Service

The handset, batteries and charger contain no user-serviceable parts. LG recommend that your LG U8120 handset is serviced or repaired by an LG authorized service centre.

Efficient use

The handset has an antenna. For optimum performance with minimum power consumption, please do not cover the antenna area with your hand. Covering the antenna affects call quality and may cause the handset to operate at a higher power level than required. This decreases talk and standby time.

Radio frequency energy

Your handset is a low-power radio transmitter and receiver. When it is turned on, it receives and transmits radio frequency (RF) energy (radio waves). The system that handles the call (the network) controls the power level at which the handset transmits.

- Further detailed information is given in this manual.

Exposure to radio frequency energy

Radio wave exposure and Specific Absorption Rate (SAR) information

- This handset model U8120 has been designed to comply with safety requirements for exposure to radio waves. This requirement is based on scientific guidelines that include safety margins designed to assure the safety of all persons, regardless of age and health
- The radio wave exposure guidelines employ a unit of measurement known as the Specific Absorption Rate, or SAR. Tests for SAR are conducted using a standardized method with the phone transmitting at its highest certified power level in all used frequency bands
- While there may be differences between the SAR levels of various LG phone models, they are all designed to meet the relevant guidelines for exposure to radio waves
- The SAR limit recommended by the International Commission on Non-Ionizing Radiation Protection (ICNIRP), is 2W/kg averaged over ten (10) gramme of tissue
- The highest SAR value for this model phone tested by DASY3 for use at the ear is 0.9800 W/kg (10g)
- The SAR limit recommended by the Institute of Electrical and Electronics Engineers (IEEE), which is 1.6 W/kg averaged over one (1) gramme of tissue (for example USA, Canada, Australia and Taiwan).

Getting Started

Using the Battery, Charger and USIM Card

Installing the Battery

To install the battery, insert the bottom of the battery into the opening on the back of the phone. Then push the battery down until the latch clicks and then install battery cover.

Removing the Battery

Turn the power off. (If power is left on, there is a chance you could lose the stored telephone numbers and messages.) Press the latches ① and open the battery cover ② . Then remove the battery.

Getting Started

If the backlight of sub-display is red when you connect charger:

The battery is fully discharged and it will take sometime(under 30 minutes) to charge the battery to minimum operating level. When the red light is on, the handset can not be powered on. The red light will be turned off if the battery is charged to minimum operating level.

Warning

You can make video call with charger connected.

But if the battery capacity is under 10% the battery can be discharged when you use video call even though the charger is connected.

Charging the Battery

To use the charger provided with your phone:

1. With the battery in position on the phone, connect the lead from the charger to the bottom of the phone. Check that the arrow on the lead connector is facing towards the front of the phone.
2. Connect the charger to a standard AC wall outlet. Only use the charger that comes included with the package.

Warning

Do not force the connector as this may damage the phone and/or the charger.

Disconnecting the Charger

When charging is finished, disconnect the charger from the power outlet and from the phone by pressing on the gray tabs on both sides of the connector while pulling the connector out.

Notice

The battery delivered with your phone has to be fully charged before using it. Do not remove the battery or the USIM card while charging.

If your phone is being charged, the display will show the charging status.

If the battery fails to charge completely:

After turning the phone on and off, please attempt to recharge the battery.

After detaching and reattaching the battery, please attempt to recharge the battery.

Getting Started

Battery Information and Care

1. Never use an unapproved battery since this could damage the phone and / or battery and could cause the battery to explode.
2. The battery does not need to be fully discharged before recharging.
3. Use only LG approved chargers specific to your phone model since they are designed to maximize battery life.
4. Do not disassemble or short-circuit the battery.
5. Keep the battery's metal contacts clean.
6. Replace the battery when it no longer provides acceptable performance. The battery can be recharged several hundred times before replacement.
7. Recharge the battery after long periods of non-use to maximize battery life.
8. Do not expose the battery charger to direct sunlight or use it in areas of high humidity such as a bathroom.
9. Battery life will decrease if exposed to extremely hot or cold temperatures.
10. Battery life will vary due to usage patterns and environmental conditions.
11. The use of extended backlighting, Browser, and data connectivity kits affect battery life and talk/standby time.

Installing the USIM card

Your USIM card contains your phone number, service details and contacts and must be inserted into your handset.

If your USIM card is removed then your handset becomes unusable until a valid one is inserted. Always disconnect the charger and other accessories from your handset before inserting and removing your USIM card.

Your USIM card may only be used in handsets which are enabled for 3 services. Any attempt to use the USIM card in other handsets may result in serious damage to the handset and may prevent you from being able to use it, including the making of emergency calls.

Notice

When you need to remove the USIM card, slide it towards the top of the phone and take it out of the holder.

Notice

Before installing always make sure that the phone is switched off and remove the battery.

The metal contact of the USIM card can be easily damaged by scratches. Pay special attention to the USIM card while handling and installing. Follow the instructions supplied with the USIM card.

Getting to know your LG U8120

Familiarise yourself with its features

Getting to know your LG U8120

Your handset's home screen

Your handset's home screen is divided into three basic displays: the icon indicator bar; a central window that includes the home screen; and the prompt bar. Each of these is described below:

The icon indicator bar

The icon indicator bar shows what operations are taking place and reminds you of battery and signal strength. This appears through all activities. The table below gives a brief explanation of the icons and their function.

The home screen

The central window of your start screen displays an image of your choice, when in use, this screen will display all of your functions and services.

The prompt bar

The prompt bar displays in the soft boxes. These are activated by pressing the appropriate soft key under each one.

Display Information

The table below describes various display indicators or icons that appear on the phone's display screen.

On-Screen Icons

Icon	Description	Icon	Description
	Battery level - indicates the amount of power in your battery. The greater the amount of solid colour the greater the power.		2G network - indicates the strength of your handset's connection with a 2G network.
	Call diverting - indicates call divert option has been selected.		No-service area - indicates you are in the no-service area.
	Call reject - indicates call reject option has been selected.		Roaming service - indicates that you are using a roaming service.
	Voice message - indicates when you have a new voice message.		ExpressLink message - indicates that there is new ExpressLink content.
	Text - indicates when you have a new text message.		Alarm - indicates an Alarm.
	Multimedia - indicates when you have a new Multimedia message.		Normal - indicates the General profile is activated
	3G network - indicates whether you are in the 3G service area.		Silent - indicates the silent menu in Profile.
	When you leave the 3G service area, your handset roams onto the voice & picture network or when abroad onto another network(2G/3G)		Vibrate only - indicates whether the vibrate function is on or off.
			Headset - indicates the headset menu in Profile.
			Outdoor - Indicates the loud profile is activated.

Getting to know your LG U8120

Your handset's keys and navigation

(1) The Triangle key

This key is your one-touch access to Today on 3, a world of communications, information and entertainment.

(2) The navigation key

Use for quick access to phone functions.

(3) The OK key

The button in the centre of the Navigation key allows you to select objects on the screen. Once you have scrolled to your desired choice use the OK key to select it. This function can be used in the majority of screens.

(4) The Menu key

This key takes you to the main menu from any screen.

(5) The Send key

This key is used to make and answer voice calls.

(6) The End key (On/Off)

This key is used to end calls and close down applications.

(7) The Clear key

This key has two functions. It will take you back to your previous screen and when in a text entry screen, it acts as a delete key.

(8) The soft keys

The left and right soft keys activate the prompts that appear in the soft boxes directly above them. These prompts change according to the screen content.

(9) The Video call key

To make and answer a video call.

(10) The Back key

This key takes you back to the previous screen.

Function of keys when phone is idle

Side of handset Keys

General Functions

Turning your handset on

Ensure that your USIM card is in your handset and the battery is charged.

Press and hold the  key until power is on.

Enter the USIM PIN code that was supplied with your USIM card if PIN code setting is on.

After a few seconds you will be registered on the network.

Turning your handset off

Press and hold the  key until power is off.

There may be some delay while the handset powers down.

Do not re-power the handset during this time.

Access Codes

You can use the access codes described in this section to avoid unauthorized use of your phone. The access codes (except PUK and PUK2 codes) can be changed by using the **Change codes** feature [Menu 9.6.2].

PIN code (4 to 8 digits)

The PIN (Personal Identification Number) code protects your USIM card against unauthorized use. The PIN code is usually supplied with the USIM card. When the PIN Code Request is set to Enable, your phone will request the PIN code every time it is switched on. When the PIN Code Request is set to Disable, your phone connects to the network directly without the PIN code.

PIN2 code (4 to 8 digits)

The PIN2 code, supplied with some USIM cards, is required to access functions such as Fixed Dial Number. These functions are only available if supported by your USIM card.

PUK code (4 to 8 digits)

The PUK (PIN Unblocking Key) code is required to unlock a blocked PIN code. Contact 3 Customer Services for the code.

PUK2 code (4 to 8 digits)

The PUK2 code, is required to unlock a blocked PIN2 code. Contact 3 Customer Services.

Security code (4 to 8 digits)

The security code protects the unauthorized use of your phone. The default security code is set to '0000' and the security code is required to delete all phone entries and to restore the handset to factory setting.

Barring Password

The barring password is required when you use the call barring function. The password is obtained from the 3 Customer Services when you subscribe to this function.

General Functions

Making and Answering calls

Ensure you tell the other party before recording a voice call.

Making and Answering a video call

You can make/answer a video call to a 3G video phone the other party must have a 3G video phone and be in a video service area.

To make/answer a video call, do the following.

1. Input the phone number using the keypad, or select the phone number from the calls made/received lists.

Note

To correct mistakes, press the key briefly to delete the last number, or press and hold the key to delete all numbers.

2. If you do not want to use the speakerphone, ensure you have the headset plugged in.
3. To start the video function, press the left soft key [Options].

Note

The video call may take some time to connect. Please be patient. The connection time will also depend on how quickly the other party answers the call. While the video call is connecting, you will see your own images; after the other party has answered, their image will be displayed on screen.

4. Adjust the camera position if necessary.
5. Press the end key to finish the call, or close the handset.

Making a voice/video call

1. Make sure your handset is powered on.
2. Enter the number including the full area code.
- To delete a digit press the  key.
To delete all digits press and hold the  key.
3. Press the  key to make a voice call. Press the  key to make a video call.
4. Press the  key to finish the call, or close the handset.

Note

To activate the speakerphone during a call, you have to press and hold the  key for at least 2 secs.

Making a voice/video call from Contacts

It is easy to call anyone whose number you have stored in your Contacts.

Press the down navigation key to access contact list.

Scroll to your chosen contact and press the  key. To make a voice call press the  key.

To make a video call press the  key. Press the  key to finish the call.

Making International Calls

1. Press and hold the  key for the international prefix. The '+' character can be replaced with the international access code.

General Functions

2. Enter the country code, area code, and the phone number.
3. Press the  key.

Adjusting the Volume

During a call, if you want to adjust the earpiece volume, use the side keys of the handset. In idle mode with the flip cover open, you can adjust the key volume using the side keys.

Answering a Call

When you receive a call, the phone rings and the flashing phone icon appears on the screen. If the caller can be identified, the caller's phone number (or name if stored in your Contacts) is displayed.

1. Open the flip and press the  key to answer an incoming call.

If the **Press any key** menu option has been set to  key, **Press any key** will answer a call except for the  key.

Notice

- ▶ To reject an incoming call, press and hold down the side key on the left side twice of the handset without opening the flip(See page 60). If the flip is open, press the  key or the right soft key twice.
- ▶ If the **Open flip** menu option ((Menu 2.8.5) is simply by opening) is on , you can answer the call simply by opening the flip.

2. End the call by closing the handset or pressing the  key.

Notice

You can answer a call while using the Contacts or other menu features.

Signal Strength

If you are inside a building, being near a window may give you better reception. You can see the strength of your signal by the signal indicator see the strength () on your handset's display screen.

Entering Text

You can enter alphanumeric characters using the keypad.

For example, storing names in the Contacts, writing a message, creating a personal greeting or scheduling events in the calendar all require entering text.

Following text input methods are available in the handset.

Changing the Text Input Mode

- When you are in a field that allows characters to be entered, you will notice the text input mode indicator in the upper right corner of the display.
- Short pressing the  key cycles between ,  and . A long press changes mode to .

Short pressing twice the  key

Press 4, 3, 5, 5, 6, to type Hello

Note

Please refer to the Using the ABC Mode on page 32.

Long pressing the  key

General Functions

Using the T9 Mode

The T9 predictive text input mode allows you to enter words easily with a minimum number of key presses. As you press each key, the handset begins to display the characters that it thinks you are typing based on a built-in dictionary. As new letters are added, the word changes to reflect the most likely candidate from the dictionary.

- When you are in the T9 predictive text input mode, start entering a word by pressing keys to . Press one key per letter.

- The word changes as letters are typed - ignore what's on the screen until the word is typed completely.
- If the word is still incorrect after typing completely, press the key once or more to cycle through the other word options.

Example

Press to type Good

Press the key to get Home

- If the desired word is missing from the word choices list, add it by using the ABC mode.

- Enter the whole word before editing or deleting any keystrokes.

- Complete each word with a space by pressing the key.

To delete letters, press the key.

Press and hold down the key to erase entire words.

Using the ABC Mode

Use the to keys to enter your text.

- Press the key labeled with the required letter:

- Once for the first letter

- ▶ Twice for the second letter
- ▶ And so on

2. To insert a space, press the key once. To delete letters, press the key. Press and hold down the key to clear the display.

Using the 123 (Number) Mode

The 123 Mode enables you to enter numbers in a text message(a telephone number, for example).

Press the keys corresponding to the required digits before manually switching back to the appropriate text entry mode.

Using the Symbol Mode

The symbol mode enables you to enter various symbols or special characters.

To enter a symbol, press the right soft key [Symbol]. Use the navigation and numeric keys to select the desired symbol and press the key.

General Functions

Character chart

General text entry rules for use with the abc mode.

Use the keypad to enter letters, numbers, symbols, and other characters with the abc mode. Press the same key repeatedly to cycle through available characters.

If you do not press a key for 2 seconds, the character in the block cursor is accepted, and the cursor moves to the next position.

Notice

Refer to the table below for more information on the characters available using the keys.

Key	Characters in the Order Display	
	Lower case	Upper case
1	@ : / . . , ? ! " 1 - () @ / : _	@ : / . . , ? ! " 1 - () @ / : _

7	p q r s 7 ß \$	P Q R S 7 ß \$
8	t u v 8 ù ú û ü	T U V 8 Ù Ú Û Ü
9	w x y z 9	W X Y Z 9
0	space 0	space 0

Menu tree

Your handset offers a set of functions that allow you to use and customise the handset. These functions are arranged in menus and sub-menus, accessed via the two soft keys marked left soft key  and right soft key .

Each menu and sub-menu allows you to view and alter the settings of a particular function. The roles of the soft keys vary according to the applications and services; the label on the bottom line of the display just above each key indicates its current role.

Press the left soft key
to access the available
Media.

Press the right soft key
to access the available
Contacts.

New message

Text message

Press the Message shortcut key to display Messages menu, select **New message** and then select **Text message**.

You can write and edit a single text message up to 160 characters. You can write and edit up to 10 concatenated messages.

1. Press the left soft key [Options]/ [Search contacts] to specify the recipient from Contacts.
2. When you input content, a new window allowing you to input content appears. By using the left soft key [Options], you can input emoticons, templates, and phone numbers through the Contacts. By using the right soft key on the bottom, you can input various symbols.
3. When the message has been sent, it will be saved in the Outbox automatically. If the message has not been sent, you can determine whether to save the message in the Drafts or not.

Multimedia message

Creating a Multimedia message

Select Messages from the top menu or pressing the Message shortcut key displays the message menu. In the menu, select Write message, and then select Multimedia message and create a Multimedia message.

You can simply send picture with a Multimedia message attaching the picture from your album or directly from the multimedia menu.

Multimedia message

1. You can create a Multimedia message.
2. Select **Multimedia message** from the **New message** menu and then press the  key.
3. You can edit a Multimedia message field using the Down navigation Key.
4. Move the highlight to the **To** field, and input the recipient of the message. You can specify the recipient by either phone number or Email address. You can search the Contacts by pressing the left soft key [Options].
When a recipient has been specified, another field where you can specify another recipient appears.
5. Move the highlight to the title field, and write a title. You can select and input a template or emoticon by pressing the left soft key [Options].
6. You can add, delete, or edit by moving the highlight to the desired slide item.
7. You can save the message in the Drafts by using the left soft key [Options] while creating a message.
8. You can preview the message by using the left soft key [Options] while creating a message.
9. When you have completed creating a message, press the  key. You can send the message by selecting Send now and Send later from the popup list, and you can save the message by selecting Save to drafts. You can preview the message by selecting Preview from the popup list.

Messages [MENU 1 go]

Creating a Multimedia message slide

1. Press the right soft key [Edit] in the slide item while creating a Multimedia message.
2. You can change the slide duration in the Slide Duration field. If you do not change it, the default value is used.
3. You can attach your desired image, audio, or video file by moving the highlight to the desired file to attach, and selecting Attach. If there is an attached image or audio file, you cannot attach a video file. If there is an attached video file, you cannot attach an image or audio file. You can cancel the attached file by using the left soft key [Options].
4. You can insert your desired content into a slide by moving the highlight to the message. You can insert templates or emoticons into the content input window by using the left soft key [Options]. You can insert the name, or phone number saved in the Contacts into the content input window by using the left soft key [Options].
5. You can add, or delete slides by using the left soft key [Options] while creating a slide.

Multimedia message send menu

Send now

Sends the created Multimedia message immediately.

Send later

Sends the created Multimedia message at the specified time.

Save as draft

Saves the created Multimedia message to Drafts.

Preview

Shows the created Multimedia message before sending it.

Viewing Multimedia messages in the Preview and Drafts

1. You can preview a created Multimedia message.
2. If the message is too long to be displayed on screen, you can scroll the contents of the message by using the up and down navigation key.
3. Press the  key to pause playback of the message, and press the  key to resume playing the message.
4. If an audio or video file is attached to a Multimedia message, press the right soft key [Unmute] to cancel the mute function.
5. Press the left soft key [Info] to stop playback, and then you can see detailed information about the Multimedia message.

Viewing Multimedia messages in the Inbox and Outbox

1. Select a Multimedia message to view its contents.
2. If the message is too long to be displayed on a screen, you can scroll the contents of the message by using the up and down direction key.
3. Press the  key to pause playback of the message, and press the  key to resume playing the message.
4. If an audio or video file is attached to a Multimedia message, press the right soft key [Mute] to activate the mute function. Press the right soft key [Unmute] to cancel the mute function.
When the multimedia message includes URL, you can try to connect the site. If the slide includes URL, you can connect the URL by long press  key.
On the other hand, when you try to press up or down navigation key, the slide show is paused automatically, and the screen shows the menu "Use link" on the right soft key if URL is included in the slide. You can connect the URL for browsing, downloading, and streaming.

Messages []

5. Move to a desired message by using the left and right navigation keys.
6. Press the left soft key [Info] to stop playback, and then you can see detailed information about the Multimedia message.
7. Press the key to play the message.
8. You can select the following functions using the left soft key [Options].
 - ▶ Reply with: Creates reply to the selected message.
 - ▶ Forward: Forwards the selected message.
 - ▶ Save address: Saves the telephone numeric in the Contacts.
 - ▶ Use number: Extracts the phone number included in the text of the message.
 - ▶ Use email address: View Email addresses up to 10 in the received message containing text. You can send a message or save as a contact by selected number.
 - ▶ Use link: View URL up to 10 in the received message containing text. You can browser web or save as bookmark by selected number.
 - ▶ Delete: Deletes the selected message.
 - ▶ Mute: Uses this menu only when the message includes audio media file.
 - ▶ View attachment: Shows the attachment file list.
 - ▶ Play again: Plays attached files.
 - ▶ Message info.: Displays information about the selected message.

Email

To send the email, you should set up the email account. Refer to Email at page 50 first.

Message edit

1. Select **Email** from the Write Message menu.
2. Input the desired Email address(es) in the To, Cc and Bcc fields. You can input up to 4 addresses in each field.

Tip

To input @, select the right soft key [Symbol], and then press 9 numeric key pad to input or press video call key.

3. Input the title of the mail to be sent in the Subject field.
4. Input the content of the mail to be sent in the Message field.
5. Specify up to 4 files to attach in the Attach field.
6. When you have finished writing a message, press the  key. You can send the message by selecting **Send now** from the popup list and you can save the message by selecting **Save as draft**. You can also preview the message by selecting **Preview** from the popup list.

Messages [MENU] [1 go]

Inbox

1. You can view saved messages. Select a message and then press the key to view the message.
2. You can view the previous or next message by using the left and right soft keys.
3. To view an Multimedia message, select **Retrieve** in the message view screen. Then the file is transmitted, and you can view the file when the message is received.
4. You can use the following functions by using the left soft key [Options].
 - ▶ **New message:** You can write a new message.
 - ▶ **Reply with:** You can create a reply to the selected message.
 - ▶ **Forward:** You can forward a selected message.
 - ▶ **Delete:** You can delete a selected message.
 - ▶ **Multiple delete:** You can delete multiple selected messages.
 - ▶ **Delete all:** You can delete all messages.
 - ▶ **Message info.:** You can view the information on a selected message.
 - ▶ **Memory info.:** You can see how much free memory you have.

Outbox

1. You can view sent messages. Select a message and then press the  key to view the message.
2. You can view the previous or next message by using the left and right soft keys.
3. You can use the following functions by using the left soft key [Options].
 - ▶ **New message:** You can write a new message.
 - ▶ **Forward:** You can forward a selected message.
 - ▶ **Edit:** You can edit a selected message.
 - ▶ **Delete:** You can delete a selected message.
 - ▶ **Multiple delete:** You can delete multiple selected messages.
 - ▶ **Delete all:** You can delete all messages.
 - ▶ **Message Info.:** You can view the information on a selected message.
 - ▶ **Memory info.:** You can see how much free memory you have.

Drafts

1. You can view saved messages. Select a message and then press the  key to view the message.
2. You can view the previous or next message by using the navigation key.
3. You can use the following functions by using the left soft key [Options].
 - ▶ **New message:** You can write a new message.
 - ▶ **Send:** You can send a selected message.

Messages [MENU 1 go]

- ▶ **Edit:** You can edit a selected message.

Emoticons

You can add, edit, and delete frequently used emoticons.

You can save emoticons that are frequently used in the input window in advance.

Settings

Text message

▶ Delivery report

Allows you to activate or deactivate the report function. When this function is activated, the network informs you whether or not your message has been delivered.

▶ Message types

The default message type should be Text.

▶ Validity period

Allows you to set the length of time for which your text messages will be stored at the Text message center while attempts are made to deliver them to the recipient.

▶ Text message centre

The number of the Text message gateway is pre-loaded in your 3 handset and you should not change this. If you delete or change this by mistake contact 3 Customer Services for support.

Multimedia message

Select Multimedia message from the Settings menu to configure Multimedia message related options.

▶ Delivery report

This menu allows you to determine whether to request a delivery confirmation mail to a recipient, and whether to allow sending delivery confirmation mail to a sender.

Request report: Determines whether to request a delivery confirmation mail for a Multimedia message.

Allow report: Determines whether to allow sending a delivery confirmation mail for a delivery confirmation mail request.

▶ Auto retrieve

This menu allows you to determine whether to automatically download a Multimedia message when a Multimedia message notification message arrives.

▶ Validity period

This menu allows you to configure the term of validity for a message when transmitting a Multimedia message. The message would be saved in the Multimedia server only for the configured term.

▶ Slide duration

This menu allows you to configure the duration of each page when writing the message.

▶ Message size

This menu allows you to configure the maximum size of a Multimedia message when writing the message.

▶ Multi. msg centre

The details for the Multimedia gateway are pre-loaded onto your handset and should not be changed. If you change or delete these by mistake contact 3 customer services for support.

Messages [MENU 1 _{ao}]

Voicemail

This menu allows you to get the voice mail if this feature is supported by the network service provider. Please check with your network service provider for details of their service in order to configure the handset accordingly.

Calling [MENU 2 abc]

Call divert

This menu allows you to configure the call divert service which diverts incoming calls to a user-specified number.

1. Press the **[MENU]** key in the idle screen.
2. Press the navigation key down to display Call and press Call divert.

Voice calls

- ▶ All voice calls
Diverts all incoming voice calls unconditionally.
- ▶ If busy
Diverts incoming voice calls when the line is busy.
- ▶ If no answer
Diverts incoming voice calls when there is no answer.
- ▶ If unreachable
Diverts incoming voice calls when the handset is turned off or the handset is out of the network service coverage

Video calls

You can divert video calls to other 3 handsets that support video calling.

- ▶ All video calls
Diverts all incoming video calls unconditionally.
- ▶ If busy
Diverts incoming video calls when the line is busy.

- ▶ If no answer
Diverts incoming video calls when there is no answer.
- ▶ If unreachable
Diverts incoming video calls when the handset is turned off or the handset is out of the network service coverage.

All fax calls

Diverts fax calls unconditionally.

Call duration

Shows call duration time by type. Press the right soft key [Reset] to reset. A security code will be requested.

Last call

Displays the duration of the last call made in hours/minutes/seconds.

Received calls

Displays received call duration.

Dialled calls

Displays dialled call duration.

All calls

Displays overall call duration.

Calling [MENU 2 abc]

Fixed dial numbers

You can fix dialling to specified phone numbers only. This information is saved on the USIM card. You must enter your PIN2 code for authentication.

- ▶ On: Enables Fixed Dial Numbers.
- ▶ Off: Disables Fixed Dial Numbers.
- ▶ Number list: You can view and edit the Fixed Dial Number list.

Call barring

Call barring allows you to restrict from making and receiving calls with your handset. For this function, you need the barring password, which you can obtain from 3 Customer Service.

Voice calls

The following options are available:

- ▶ All outgoing: Calls cannot be made.
- ▶ Outgoing international: International calls cannot be made.
- ▶ Outgoing international calls except home country: When abroad, calls can be made only to numbers within the current country and to your home country, which is where your home network provider is located.
- ▶ All incoming: Calls cannot be received.
- ▶ Incoming when abroad: Calls cannot be received when you are using your handset outside your home service area.

Video calls

The following options are available:

- ▶ All outgoing: Calls cannot be made.
- ▶ Outgoing international: International calls cannot be made.
- ▶ Outgoing international calls except home country: When abroad, calls can be made only to numbers within the current country and to your home country, which is where your home network provider is located.
- ▶ All incoming: Calls cannot be received.
- ▶ Incoming when abroad: Calls cannot be received when you are using your handset outside your home service area.

Deactivate all

All call barring settings are deactivated; calls can be made and received normally.

Settings

Call waiting

The network will notify you of a new incoming call while you have a call in progress. Select Activate to request the network to activate call waiting, Deactivate to request the network to deactivate call waiting, or View status, to check if the function is active or not.

Calling [MENU 2 abc]

Send my number

This network service allows you to set your phone number to be displayed (**On**) or hidden (**Off**) from the person whom you are calling. Select **Set by network** to reset the handset to the setting that you have agreed upon with 3 Customer Service.

Call reject

This menu allows you to enable or disable call reject for all numbers or a specific number.

- ▶ Off
- ▶ Reject on list

Configures conditional call reject mode. Press the right soft key [Setup] to add the phone number to be rejected. When you add a number to the list, you can select either Silent or End call as a reject method. When you add a number to the list, you can add the number by entering it directly or by searching for the number in the Contacts by selecting Search.

- ▶ Reject all calls

Auto redial

The menu enables you to configure the auto redial function when a call attempt has failed.

Answer mode

Allows you to determine when to answer the handset.

- ▶ Press send key: You can answer an incoming call by only pressing the key.
- ▶ Open flip: This option allows you to answer a call simply by opening the flip.
- ▶ Press any key: You can answer an incoming call by pressing any key, except the key, soft keys and side keys.

Minute minder

This function sounds an alert notification every 1 minute after call connection.

Select line

If your USIM card has two phone lines, you can switch between line1 and line2.

Contacts [MENU 4 ghi]

This menu allows you to save and manage contact address information. The Contacts functions provide functions to add a new address or search saved contact addresses by name, phone number and group information.

Add new

This menu allows you to add a new contact address. You can input contact address information including name, phone numbers, email addresses, group information items, memo, homepage address, ringtone, and avatar or image (photograph).

You have to select Handset or USIM card memory using the left and right navigation keys.

Search

This menu allows you to search your contact addresses. Generally the search operation is performed by name. In the search window, the current search function and results for the search condition are displayed.

On the screen, a saved image or avatar is displayed for the selected contact address. You can change the configuration in the [Options] menu so that no image or avatar is displayed. You can also make a phone call or send a message to the selected phone number.

Group

This menu allows you to manage group information. By default, there are 4 groups: family, friends, colleagues and school. You can edit and delete a group. You can also configure ringtone for a group so that the group ringtone sounds when a call from a specific contact address within that group arrives and there is no ringtone configured for the contact address.

Speed dials

This menu allows you to configure speed dial numbers. You can select a number as a speed dial between 2 and 9. You can configure speed dial numbers for any of the 5 numbers for a specific contact address so that a contact address may have multiple speed dial numbers.

Clear Contacts

This menu deletes contact address information. You can delete contact addresses saved in the handset memory and you can delete the numbers saved on the USIM card.

Service dial numbers

This menu allows you to make a call to one of the numbers provided by 3 Customer Service by moving the highlight to the desired number and pressing the key. (E.g. 3 customer service, mail, 3 customer finance, etc.)

Copy all

This menu allows you to copy all information from your USIM card, e.g. name, handset number, etc., to your handset. If a name is duplicated during the copying operation, the information is duplicated.

- ▶ Handset to USIM: You can copy the entry from the handset memory to the USIM card (not all the data will be copied).
- ▶ USIM to handset: You can copy the entry from the USIM card to phone memory.

The following options are available:

All together: You can copy all your contacts at a time.

One by one: You can copy selected contacts one by one.

Contacts [MENU 4 ghi]

The screenshot shows a menu titled "Move all". It contains two options: "Handset to USIM" and "USIM to handset". At the bottom of the screen, there is an "OK" button.

- Move all
- Handset to USIM
- USIM to handset

OK

Move all

This menu allows you to move all the information from your USIM card, e.g. name, handset number etc., to your handset. This differs from the Copy all operation in that the target information is saved only in the destination location.

- ▶ Handset to USIM: You can move the entry from the phone memory to the USIM card.
- ▶ USIM to handset: You can move the entry from the USIM card to phone memory.

The following options are available:

All together: You can move all your contacts at a time.

One by one: You can move selected contacts one by one.

Own number

Allows you to display your phone number in the USIM card. You may change or add to the information.

The screenshot shows a menu titled "Settings". It has two main sections: "Display data" and "Show image/avatar". Under "Display data", there is a sub-section "Handset & USIM". Under "Show image/avatar", there is a setting "Off" with a left and right arrow button. At the bottom of the screen, there is an "OK" button.

- Settings
- Display data
 - Handset & USIM
- Show image/avatar
 - Off

OK

Allows you to set the display way as for the following items.

Display data: Handset & USIM / Handset / USIM

Show image/avatar: On / Off

5.1 My applications

5.2 Download applications

5.3 Settings

Applications

[MENU]

[5 JKL]

This Handset supports Java™ so that you can download games from Today on 3, and play them on your handset.

Games can be downloaded from the game page of the H3G portal site. Users can go to that page using the key. The key loads the H3G portal page.

Users should select the game icon in the main page. (usually it is the page that appears when a user selects the tab beside "Today on 3") In the game page, users can view the game list, select, and download games. Or, users can use the Download applications menu to go to the game page.

Note

Please note that downloading a game usually requires additional charge.

My applications

This menu is used to locate and run downloaded applications, e.g. games. Select Download to view the list of applications that have been downloaded to the handset.

Download applications

This menu is used to go directly to the game download page, so that users can browse and select the games to download. This is possible because the Internet browser is launching with the game portal URL setting. This URL is specified in the Settings menu - Java Portal URL.

By default, the setting is on the game page of the H3G portal (or, it can be left blank if the Operator does not specify the URL). If users want to change the default setting, the game portal URL can be modified in the Settings menu.

Settings

This menu is used to configure the Java Internet portal site to connect to in order to download applications.

If this menu is selected, the list of currently saved Java Internet portal sites and the configured displayed.

The first Settings screen: Shows the item list if there are saved items.

1. Select an item using the up or down navigation keys.
2. Press the  key to activate the selected item service.
3. Press the left soft key [Options] to display the popup menu. Select [Edit] from the popup menu to edit the contents of the selected item.

Press the left soft key [Options] to display the following popup menu items.

- ▶ Add new: New profile is added.
- ▶ Edit: You can edit the selected item.
- ▶ Delete: Deletes the selected item.
- ▶ View: Shows the contents of the selected item.

Note

Select "Applications → Settings". In the "Settings", add a list item that specifies the URL of Java game site. and turn the list item "ON". Launching WAP browser by selecting "Applications → Download applications". WAP browser will show you the URL page from the list item activated in the "Applications → Settings" menu. Selecting a Java game link while browsing the page will lead to downloading the java game. Just follow the user message to download java games.

All the java applications downloaded are listed in the "Applications → My applications" menu.

6.Browser

- 6.1 Home**
- 6.2 Bookmarks**
- 6.3 Saved pages**
- 6.4 Go to URL**

This function automatically searches for the network and registers the handset to the network.

► Manual

This function enables you to search the network list and specify which network to attempt registration with.

Preferred list

You can select preferred lists to display it saved in the current USIM card and can edit the current preferred list.

Access points

This menu shows the Access Point List. Select the right soft key [Edit]. Access Point has the following items.

A screenshot of a mobile phone's menu interface. The title bar says "View". The main list shows:

- Connection title: 3
- Bearer: UMTS
- Username

At the bottom are two buttons: "OK" and "Edit".

► Connection title: Profile Name

► Bearer: UMTS/GPRS/CSD

► Username: User name

► Password: Password

► APN: APN information of the service provider

To modify these settings please call 3 Customer Service.

Security

You can set a PIN code. When it is activated, a window asking you to enter the PIN code appears when you turn on the handset so as to prevent unauthorized use of the handset.

PIN code request

You can activate a PIN (Personal Identification Numeric).

You can check the current status of configuration from the status bar.

1. Select PIN code request from the security menu and press the  key.
2. Configure this item to On or Off. If it is On, a PIN code will be required whenever the handset is turned on.
3. Input the current PIN code and press the  key.
4. Entering an incorrect PIN code 3 times in the PIN code input window invalidates the PIN code. In this case, the PUK code must be entered in order to reset the PIN code.
5. The maximum number of attempts at PUK code input permitted is 10. Entering an incorrect PUK code 10 times will restrict use of the handset. In this case, ask 3 Customer Service to unlock your handset.

Press the Back key in the PIN code input window to return to the previous step.

Change codes

You can change PIN, PIN2, the security code and the call barring password.

Note

If you change the code and then forget it you will need to contact your place of purchase to unlock it or solve this problem.

Settings

[MENU] [9 WXYZ]

Change codes

- PIN
- PIN2
- Security code
- Barring password

OK

► PIN/PIN 2 code

This menu allows you to change the PIN or PIN2 code.

1. Select Change codes from the Security Settings List and press the key.
2. Select PIN or PIN2 Code and press the key.
3. Input the current PIN or PIN2 code, and then a new PIN or PIN2 code. Entering an incorrect PIN code 3 times invalidates the PIN code. In this case, you will need to enter the PUK or PUK2 code in order to reset the PIN code.
4. Entering an incorrect PUK code 10 times will restrict use of the handset. In this case, ask 3 Customer Service to unlock your phone.

► Security code

This menu allows you to change the handset password. The maximum allowed numeric of attempts of security code input is not limited like PIN and PIN2.

► Barring password

This menu allows you to change the call barring password.

Security

Handset lock

- When switching on
- If USIM changed
- Immediate
- None

None

OK

Handset lock

You can use security code to avoid unauthorized use of your handset.

When you switch on your handset, your handset will request security code always if you set phone lock to "Power on".

You can select the menu from **When switching on**, **If USIM changed**, **Immediate**, and **None**.

Connectivity

This function shows the status of the connection between other devices and this handset. You can select USB or IrDA.

Memory status

This menu is used to view the memory usage of the phone and USIM card. You can obtain information about the amount of memory used by the contacts, the calendar, to do, memos, secret memos and text message and multimedia messages.

Common memory

This function shows the status of the user memory of the handset.

Reserved memory

This function shows the available memory for the user.

USIM memory

This function shows the status of the USIM card user memory.

Language

This function allows you to set the language used in the handset.

Reset settings

This function allows you to restore factory settings.

Undertaking a reset will not remove any user content.

And so on...

Troubleshooting

Please check to see if any problems you have encountered with the phone are described in this section before calling 3 Customer Service.

Q How do I view the list of outgoing calls, incoming calls and missed calls?

A Press the  key.

Q How do I view all numbers stored in memory?

A Press right soft key[Contacts] and then  or press the down navigation key.

Q Why is the connection inconsistent or not audible in certain areas?

A When frequency environment is unstable in a certain area, connection may be inconsistent and not audible. Relocate to another area and try again.

Q Why does the display not turn on?

A Remove and insert the battery, then attempt to power-on. If there is no change, fully charge the battery and try again.

Q Why is there an echo when a connection is made with certain telephones in a certain area?

A This is called the 'Echo Phenomenon', where it occurs if connection volume is too high or caused by special properties (semi electronic telephone exchange) of the equipment on the other end.

Q Why does the handset heat up?

A The phone may get hot when there is a very long call duration or when games are played or when using the browser. This has no effect upon the life of the product or performance.

Q Why is there no ringtone, but only a blinking LCD screen?

A Phone may be set to 'Vibrate only' or in 'Silent' mode. In the Profiles menu, please select 'Normal' or 'Outdoor'.

Q Why does the battery life get shorter in standby mode?

A The battery is worn out. As time passes, the battery life gradually becomes shorter. If the battery lasts about half the amount of time as when first purchased, it's time to purchase a new battery.

Q Why does the battery run out so quickly during normal use?

A It is due to the user environment or a large number of calls or weak signal.

Q Why is no number dialed when you recall a Contacts entry?

A Check that the number has been stored correctly by using the Contacts feature. Re-store them, if necessary.

Q Incoming calls do-not reach me.

A Is your phone switched on ( pressed for more than three seconds)? Are you accessing the right cellular network? Or, you may have set an incoming call barring option.

Q I cannot find the lock, PIN, or PUK code. What is my PIN?

A The default lock code is '0000'. If you forget or lose the lock code, contact your phone dealer. If you forget or lose a PIN or PUK code, or if you have not received such a code, contact 3 Customer Services.

Q What happens to the handset if it is dropped?

A The handset could power off or reset, but this does not necessarily imply any permanent damage.

Accessories

Charger

This adapter allows you to charge the battery. It supports standard Europe/Australia/U.K. and Hongkong (100-240 Volt 50/60Hz outlets).

It takes 3.5 hours to charge a completely discharged battery.

Europe

Australia

U.K and Hongkong

Headset

Connects to your phone, allowing hands-free operation. Includes earpiece, microphone, and integrated call answer/termination button.

**USB cable**

Connects your phone to a PC.

**Hand strap****Battery**

Glossary

2G

Second Generation wireless communication system. 2G system supports low quality voice and low-rate packet-data service. 2G refers to GSM in European countries, and CDMA in America.

3G

Third Generation wireless communication system. 3G means next generation wireless communication system developed based on the second generation wireless communication systems. 3G system supports real-time communication service and high-rate packet-data service. 3G refers to UMTS developed based on GSM in European countries,

Access point

Access point refers to a point through which users can connect to the network so that the users can use the network services.

AMR

Adaptive Multirate codec. A voice codec developed by ETSI for GSM. AMR supports 8 coding rates (from 4.75 to 12.2Kbps) so as to adaptively provide the quality of voice service in various radio channel conditions.

Download

Download means transmitting files from one computer system to another. Downloading usually means transmitting files from a big system to a small system.

IrDA (Infrared Data Association)

A standard defined by the IrDA consortium. It specifies a way to wirelessly transfer data via infrared radiation. The IrDA specifications include standards for both the physical devices and the protocols they use to communicate with each other.

Java™

Programming language generating applications that can run on all hardware platforms, whether small, medium or large, without modification. It has been promoted for and geared heavily to the Web, both for public Web sites and Intranets. When a Java program runs from a Web page, it is called a Java applet. When it is run on a mobile phone or pager, it is called a MIDlet.

Line Identification Services (Caller ID)

Service allowing subscribers to view or block the telephone numbers of callers.

MIDI

Musical Instrument Digital Interface. A file format to save digitized musical instrumental data. The original meaning of MIDI, or Music Instrument Digital Interface is a protocol to exchange data between a computer and electric instruments.

MMS (Multimedia Message Service)

A message service for the handset environment, standardized by the WAP Forum and the 3rd Generation Partnership Program (3GPP). For phone users, MMS is similar to Short Message Service (SMS)-it provides automatic, immediate delivery of user-created content from phone to phone. The message addressing used is primarily phone numbers, thus the traffic goes from phone to phone. MMS also provides support for e-mail addressing, so that messages can also be sent by email. In addition to the text content of SMS, MMS messages can contain still images, voice or audio clips, and later also video clips and presentation information.

MP3

Moving Picture Experts Group Layer-3 Audio. A file format to provide high-quality audio whose quality is equal to that of CD. MP3 is a digital audio standard developed by MPEG, or Moving Picture Experts Group and is widely used for digital audio files.

Glossary

MPEG4

Motion Picture Experts Group 4. A digital video standard developed by MPEG, or Moving Picture Experts Group. MPEG4 compresses video data so that a large video file can be transmitted, and saved more easily. MPEG4 is suitable especially for mobile environment.

Multimedia

Multimedia means media that include various media data such as voice, character string, image, and video data. Currently, the meaning of multimedia includes services provided through multimedia.

Multiparty Calls

Ability to establish a conference call involving up to five additional parties.

Roaming

Use of your phone when you are outside your home area (when traveling for example).

SDN (Service Dial Number)

Telephone numbers supplied by your network provider and giving access to special services, such as voice mail, directory inquiries, customer support and emergency services.

SMTP

Simple Mail Transfer Protocol. A protocol to transfer e-mails between computers over the Internet. SMTP defines the format of control messages between computers, and interaction procedures between them to send e-mails.

Quick play

Quick play means a new type of service that enables users to listen to an audio or watch video without downloading complete audio or video file so that contents providers can provide audio or video data such as movie or news over the

network in real-time on users' demand.

Sync

Sync means synchronizing PIM (Personal Information Management) data such as contact information, schedule, to-do, and memo with a PC or an external server.

UMTS

Universal Mobile Telephony System. UMTS refers to asynchronous 3G wireless technology of WCDMA that is developed based on GSM, the 2G wireless technology.

USB

Universal Serial Bus. A bus type interface that provides fast and flexible connection between devices and a computer.

USIM

Universal Subscriber Identity Module. An IC card used for UMTS the shape of which is the same as that of the SIM card of GSM. USIM is provided by network operator, and carries the authentication and service grade data for the network operator as well as user-specific data.

Video call

A communications service that enables users to talk watching each other over a 64Kbps data channel. Real-time video call service is a new type of service provided by WCDMA wireless communication system that is developed based on GSM+GPRS technology.

Voice mail

Computerised answering service that automatically answers your calls when you are not available, plays a greeting and records a message.

Declaration of Conformity

LG Electronics

This model complies with the essential requirements of Article 3 of the R&TTE 1999/5/EC Directive, if used for its intended use.

1. Health (Article 3.1.a of the R&TTE Directive)
2. Safety (Article 3.1.a of the R&TTE Directive)
3. Electromagnetic compatibility (Article 3.1.b of the R&TTE Directive)
4. Efficient use of the radio frequency spectrum (Article 3.2 of the R&TTE Directive)

I hereby declare under our sole responsibility
that the product mentioned above to which this
declaration relates complies with the above
mentioned articles of the directive.
