# Benefon Dragon NMT 450i

## Benefon Dragon NMT 450i.

**It's handy to be small and stylish.**

Would you use a hammer with an angular handle? Or a square mouse with your computer? Probably not. So go on demanding ergonomy, style and quality of your tools, also those you use for communication.

In Benefon Dragon, design doesn't stand just for excellent looks, but for greater comfort. The shape of Benefon Dragon is beyond comparison – the phone fits your hand like a glove. Every single detail has been taken into account to produce better ergonomy: the clear keypad structure assures precise

dialing and the large display helps reading and writing SMS messages.

Benefon Dragon is a true quality phone. Every phone that leaves the factory goes through strict quality testing, including a test in extreme temperatures. And thanks to the revolutionary Voice Privacy system (optional), Benefon Dragon is a safe phone for your confidential conversations.

The radio technology of Benefon Dragon is incomparable. Unparalleled reception and optimized network access are always guaranteed – no matter what the conditions.
