# Kyocera's Smartphone Series

Access all the data you need to work—and play—from one convenient place: Kyocera's smartphone. As you'd expect from Kyocera, this technology-packed device is far more than just a phone. In fact, Kyocera's smartphone integrates a Palm™ handheld, a digital phone and a wireless modem into one compact package.

Productivity knows no bounds with Kyocera's smartphone. Think multipurpose: Participate in a meeting with the speakerphone, record a voice memo for posterity and dial—using just your voice—while your hands are busy doing something else, like jotting down notes for the next big assignment. Need to retrieve data, or send or receive e-mail? Done.\* Plus, this phone lets you choose from 11 different ringer types and a vibrate alert for those times when a ringing phone just doesn't cut it.

Kyocera's smartphone is state-of-the-art, combining the top three modes of network coverage—CDMA digital PCS, CDMA digital cellular and analog—so you get and stay connected almost anywhere you go. And, because it's a computer as well as a phone, Kyocera's smartphone does much more. It supports the installation of hundreds of applications compatible with Palm OS® software; supports multiple wireless technologies so your stock reports, movie times and flight schedules are always accessible; even taps into your corporate network and enterprise-wide applications using appropriate software.

Kyocera's smartphone—your smart choice for on-the-go wireless productivity.

Your Palm Powered™ wireless solution
