Introduction

Safety Precaution / Measures

Please comply with these precautions / measures to avoid dangerous or illegal situation and ensure peak performance of your phone.

Road safety

The use of a mobile phone while driving is illegal and should be avoided at all costs. If you need to make or receive an urgent call, move your vehicle to the side of the road and allow it to come to a complete stop before using your phone.

Switch off in potentially hazardous environments

Switch your phone off while boarding an aircraft. Signal from your phone can affect aircraft system. You are legally obliged to comply with this recommendation.

Switch your phone off when entering any explosive area. Observe any provided guidelines or regulations.

Emergency Calls

In case of an accident or an emergency, dial 100 (Police), 101 (Fire) or 102 (Ambulance) from your phone. Being emergency numbers, these are toll free and can be reached even from areas where the network signal strength is very poor.

Battery Use

First time charging must be done using the regular charger and not using the USB cable.

During the first 3-4 charge sessions, charge the battery until it has been fully charged according to the battery level indicator. This ensures higher battery backup and extends the battery life.

Avoid partial charging. Wait for the battery to discharge completely before charging it again.

Charging through the USB Cable should be reserved during an emergency.

Use the device in vibrating mode only on rare occasions.

Getting Started

Inside the Box

The device package consists of:

- Base Transceiver

- Battery

- Charger

- Data cable

- Hands free kit

- User Manual

Installing and Removing the Battery

To install the battery:

1. Locate the grooves at the bottom sides of the phone and pull the back cover to open.

2. Push the battery in the battery compartment in such a way that the connectors of the phone are aligned with the connectors on the battery.

To remove the battery:

1. Turn off the phone and unplug it , if it is connected to an external power source, unplug it.

2. Remove the back cover.

3. Pull out the battery from the battery compartment.
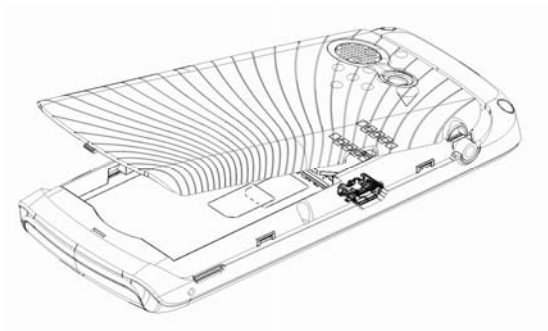

Inserting SIM Cards

The V1422 supports dual-SIM cards. The procedure for inserting both SIM cards is identical, only the slot for each is different. To insert SIM cards:

1. Remove the back cover, and pull out the battery from the battery compartment.

2. Slide the SIM card in the slots, the metal connectors for SIM1 should face up, while for SIM2 it must face downwards.
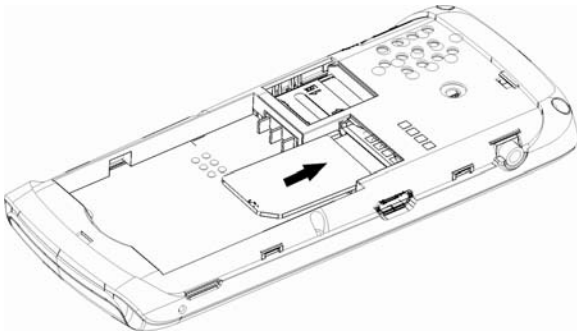

Inserting the Memory Card

Use a microSD card of up to 2GB capacity to store personal files such as photos, audio files, and videos. To insert the memory card:

1. Switch off the device, and remove the back cover, and pull out the battery from the battery compartment.

2. Unlock and lift the memory card cover.

3. Place the memory card with metal connectors facing down.

4. Lock the memory card cover.

Charging the Device

Insert the Plug of your charger to the charging port at on the side of the phone.

When you begin to charge the battery, the stripe of Signal Strength on the right corner of the screen starts to roll. When battery gets fully charged, the stripe becomes stable and stops rolling.

Get Connected

Connecting to the PC

The Videocon V1422 handset can be connected to any computer using the provided USB cable. Connect the smaller end of the cable to the input slot at the side of the phone, and the other end to a USB port on your computer. Choose Yes to use the phone as a mass storage. In mass storage, the phone displays as a drive in Windows Explorer of your computer. You can directly copy, paste and delete data as you would normally do with the folder on your computer's hard drive. Selecting No, puts the phone in the charging mode.

Basic Operations

Make a Call

In the idle mode:

- Enter the phone number including the area code. Press Clear to erase a digit.

- For international calls, insert the '+' sign followed by the country code, area code (without the initial zero and phone number.

- Press the dial key. Once the call is complete, press the End key.

To receive a call, press the **Option →Answer** or receive it directly by pressing the Dial key.

Making a Call using Call History

The number and time of each call that you make or receive is stored in the Call history module of the device. You can retrieve a number from call history and initiate a new call. To do so:

- Press the Dial key to view a list of recently dialed numbers.

- Use the up and down navigation keys to select **SIM1 Call History** or **SIM2 Call History** to choose the card for which you wish to view the call history.

Managing the Phonebook

Phonebook is a location in your phone's internal memory on which you can store names and numbers of contacts. The SIM cards also allow you to store phone numbers, though the service provider decides the capacity. Even though, the SIM card and the phone's internal memory are physically separate, they are used as a single entity known as the Phonebook on the phone.

Quick Search

Input few letters from a contact name. All matching contacts display, use the Up or Down navigation keys to select the required contact and press the Dial key.

Search Entry

Input the name to search the designated record.

Add new Entry

Add a new contact to the phonebook. You can choose to store the contact in the SIM or Phone memory.

Copy all

Use Copy All function to select and copy all contacts to SIM1, SIM2, Phone, or vice versa.

Delete

Delete selected contacts you can choose to delete contacts from SIM card or from the phone, or delete contacts one by one.

Caller groups

You can set five caller groups, including names, associated sound, associated pictures and members. You can set objects by pressing the left and right direction keys.

Extra number

You can set the owner number, the service dialing number, and the SOS number.

Backup and Retrieve

Backup our phone contacts to the microSD card.

Phonebook Settings

The available options in phonebook settings are:

- Memory Status: Enables to check out the memory status individually for both the SIM and phone respectively.

- Preferred Storage: The memory type you want to use for storing contacts. The options available are SIM1, SIM2, and Phone.

- Fields: Enables to set the different fields which are to be entered during addition of a contact.

- My vCard: Store your personal contact information as a vCard to allow quick sharing of your details with contacts. Once you have entered your contact information, use the Send my vCard option to send your vCard via SMS or through file transfer over Bluetooth.

Messages

In Messages, you can send and receive text messages. To launch messages, on the idle screen, select **Menu → Messages** to view the available functions. Message functions are available depending on network services that your service provider supports.

SMS

- Inbox: Messages received using SMS are stored in the Inbox folder.

- Outbox: Sent messages are stored in the Outbox.

- Write Message: Create and send a text message.

- Template: Your phone contains pre-defined templates for frequently used messages.

- Message Settings: You can edit the profile settings and the common settings, check the memory status.

MMS

- Create message: Create and send a multimedia message.

- Inbox: Messages received using MMS are stored in the Inbox folder.

- Outbox: Sent messages are stored in the Outbox.

- Draft: Saved messages are stored in the draft folder.

- Template: Your phone contains pre-defined templates for frequently used messages.

- Message settings: You can edit the profile settings and the common settings, check the memory status.

Chat Room

Chat room enables you to enter 2 different user's default settings (Chat Room1 and Chat Room2) to enable sending and receiving the messages. Chat option enables you to see the complete conversation on a single window.

Voice mail server

Voice mail server is an interactive system for storing, processing and reproducing verbal messages through a voicemail server. The service is operator dependant and the settings are provided by the operator upon activating the service on the SIM card.

Broadcast message

Your phone is capable to receive and store broadcast messages. You can set the receive status to ON/OFF. These messages are stored I the Stored Messages folder.

Call history

Use this menu to view the dialed, received or missed calls. On the Idle screen, press **Menu→ Call history**. The **Call history** menu comprises the **Call History** and **General Call Settings**

Call History

Displays the list of recent received, dialed, or missed calls for each SIM.

- Missed Calls: displays the list of latest missed calls.

- Dialed Calls: displays the list of latest dialed calls.

- Received Calls: displays the list of latest received calls.

- Delete call logs: Delete Missed calls, Dialed calls, Received calls and Delete all on the SIM card.

- Call timers: view Last call time, Dialed calls, Received calls and Reset all time of the SIM card.

- Call cost: view Last call cost and Total cost and so forth of the SIM card. You can also Reset cost and set the Maximum cost and the Price per unit for SIM1 card. It requires network support.

- SMS counter: view and reset the numbers of text messages that are sent and received from the SIM card.

- GPRS counter: view and reset the total amount of data was sent or received.

General call settings

Use this menu to specify call options for either of the SIM cards. The following options are available for both SIM1 and SIM2:

- SIM 1 Call Settings: Send Caller Id: This is network service.

- Blacklist: Set whether to activate the incoming call filter, and edit the blacklist.

- Speed dials: Select On, and assign the numbers (2-9) to your frequently dialed numbers.

- IP Number: Use this option to automatically prefix a country's international dialing code to a contact. You may define a maximum of three international prefixes. If needed, you can activate each prefix on both SIM cards simultaneously.

- Call time display: After setting this function on, you can view the call time displayed on the screen.

- Call time displays: Choose to display or hide the call duration while receiving or making a call.

- Call time reminder: After setting this function to 'on', it will offer a warning tone towards the single or periodic setting as your own during the call process, so you will be reminded of

the call time at periodic intervals during a call.

- Auto quick end: Can be set to open or close the function, duration of time 1-9999 seconds.

Settings

For more information on configuring phone settings, refer to the following chapter.

Multimedia

Camera

Your phone is equipped with a camera on the back of the device that can be used to take still photographs. Select **Menu** → **Multimedia** → **Camera** to launch the camera application. Once the camera application is enabled, press the OK button to capture the

image. Press the options keys to access the following sub-options:

- Camera Settings: select the shutter sound and the banding of the captured image.
