

Lemon Duo212

SAFETY PRECAUTIONS

Before using your phone, please read the following important information to eliminate or reduce any possibility of causing damage and personal injury

	Do not use wireless phones while driving.
	Switch off wireless devices in aircraft. The signal may cause interference. Using them on aircraft is illegal.
	Do not use mobile phones where blasting is in progress. Follow regulations and rules strictly.
	Do not use mobile phones at a refueling point. Don't use near fuel or chemicals
	Follow regulations or rules in hospital and health care facilities. Switch phone off near medical equipment.
	All wireless devices may get interference that could affect performance.
	Only qualified service personnel can install or repair this device.
	Use only approved accessories and batteries.
	Use only in normal conditions. Do not expose your phone to extreme high temperatures above +60° (+140°F) . Do not use anything static to clean your phone.
	Ensure the phone is turned on and in service. Enter the emergency number, then press Pick Up key. Give your location. Do not end the call until told to do so.

Improper use will invalidate the warranty! These safety instructions also apply to original accessories.

Foreword

Thank you very much for choosing Lemon mobile phone! This phone is a mobile phone with Dual SIM Cards, Dual Standby and Single Channel.

Our products confirm to the Industry Standard for Communication in PRC as well as European Standard. They shall be applicable to GSM network after they have been approved.

The GSM network is a kind of international standard global cellular communication system. Your mobile phone can access multiple international networks. It allows you to make or receive international calls, just like using in your own hometown. However, services required must be applied for and purchased before you can enjoy these advanced functions provided by the network.

To make better use of your mobile phone, we suggest you read this instruction carefully, so as to take full advantage of various functions introduced in this instruction.

In view of network configuration of the mobile phone and services provided by it, some functions may not be allowed to use, please consult vendor or network operation's company.

1. Security Requirements

If your mobile phone is lost or stolen, inform immediately to telecom operator or its outlet to forbid the use of your mobile phone and SIM card, which will help you to avoid the economic loss caused by other's by misusing your telephone.

When you get contact with the telecom operator or its outlet, they need to know the IMEI number of your mobile phone, which is marked on the tab on the back of your mobile phone (you can find it with battery taken out). Keep the number for future use.

Please take precautionary measures to use your mobile phone more safely. Such as: Set SIM and PIN to avoid the misuse of your SIM card.

When you leave your car, please do not put the mobile phone in a place easy to be seen. Better take it with you or put it in trunk.

■ Security Warnings and Precautions

Please read these precautions with care before you use your phone to ensure that you will use it correctly.

■ General Precautions

In the places where the use of mobile phone is forbidden, such as on the airplane and in the hospital, please turn off your phone as it is required, otherwise it will effect normal operations of electronic devices and medical instruments. Please observe the relevant specifications of this location in case you should use your phone.

Please strictly adhere to local rules and regulations on the use of mobile phone when you are driving. Please follow the rules below in case you should use your phone when you are driving: focus on driving and pay attention to the road condition; if your phone has a function of hands free, please use it for conversation; if you are in bad driving condition, please park your car first, and then make or receive a phone call.

Near the places with fuels, chemicals or explosive substance, please follow laws or regulations and related signs.

Please keep your phone, battery and charger in a place that is not reachable to children, to avoid anything that causes physical harm.

Your phone can only be used with specified battery, charger and other accessories provided by the company, to avoid any damage to your phone. In case

of using other batteries and chargers, it shall be possible to cause failures, such as battery leaking, overheating, bursting and flaming.

Please do not use your phone near weak signals or high precision electronic devices. Radio interference of mobile phone may be subject to cause mal-operations of these electronic devices and other problems. You should pay special attention, especially near the following devices: hearing aid, artificial pacemaker and other medical electronic devices, fire detector, automatic door and other automatic control units. Detailed information about impact on devices, please consult the manufacturer and local vendor of that device.

Please do not strike, shock or throw your phone violently, so as to avoid failure and flaming of your phone.

Please do not put your phone, battery and charger into microwave oven or high voltage equipment, otherwise it may be subject to cause accidents, such as circuit damage and flaming.

Please do not use your phone in any places with flammable and explosive gas, otherwise there is a risk of phone failure and fire.

Please do not place your phone in any place with high temperature, high humidity and high dust content, otherwise there is a risk of phone failure.

Please do not place your phone in any unstable position, so as to prevent it from falling and causing any failure or damage.

■ Precautions on Mobile Phone Usage

Do not remove or refit your phone, or it may subject to cause damage, electrical leakage and circuit failure. If it is necessary, please send it to specialized maintenance points.

Non-professionals shall not remove the phone arbitrarily.

Please do not hit the LCD forcefully or use it to hit other things, as liquid crystal panel will brake and the liquid will leak. There is a risk of loss of sight if the liquid got into your eyes.

Please wash your eyes with clean water immediately on such occasion, and see doctor right away.

In rare cases, there is a reverse effect on the in-car electronic devices when the phone is used in such cars. At this point, please do not use your phone, so as not to lose the security insurance. Your car is equipped with an air bag, please do not put your phone on the air bag or any areas that the air bag can touch after its deployment, so as to avoid the phone will withstand a strong external force when the air bag deploys, and thus causing a serious injury to people sitting in the car.

Please do not use any sharp objects such as needle and pen point to touch the buttons, or it may be subject to damage the phone or cause mal-operation.

Avoid your phone being too near with any magnetic objects such as magnetic card, radiated waves of your phone may clear the information stored in the floppy disk, stored-value card and credit card.

Please put small metallic products such as drawing pin far away from the speaker of your phone. The loudspeaker has a magnetic property while working, which will magnetize these small metallic products, and thus may cause physical injury or phone damage.

Avoid your phone being exposed to moisture, water or any other liquid getting into it, and thus causing short circuit, electrical leakage and other failures of your phone.

Please use your phone in a place far away from fixed telephone, TV, radio and official automatic equipment, so as not to affect the performance of these devices and your phone.

■ **Precautions on Battery Usage**

Please do not remove or refit the battery, or it may be subject to cause leaking, overheating, bursting and flaming of the battery.

Do not put used batteries in household garbage. In any locations with explicit specifications of used battery treatment, please handle them in accordance with the specified instructions.

Please do not throw the battery into fire, which may cause fire and explosion.

Do not exert pressure forcibly while assembling your battery or it will cause leaking, overheating, bursting and flaming of your battery.

Please do not use any metallic products such as wire and needle to make the battery short circuit; and do not put the battery together with any metallic products such as necklace, otherwise it will cause leaking, overheating, bursting and flaming of your battery.

Please do not weld contacts of the battery, otherwise it will cause leaking, overheating, bursting and flaming of your battery.

There is a risk of loss of sight if the liquid of the battery got into your eyes, please do not rub your eyes with your hands, but wipe up with dry towel, and then see doctor right away.

Please do not use or put your phone in high-temperature such as around fire and heater, otherwise it will cause leaking, overheating, bursting and flaming of your battery.

If phenomena such as abnormal warming, discoloration and deformation occur while the battery is in use, charging or storage, please stop using the battery and replace with a new one.

If the leaky liquid of the battery contacts with your skin and clothes, which may burn the skin, wipe up with dry towel immediately, if necessary, see doctor right away.

If there is leaky liquid or a strange odor of the battery, please take it far away from open fire, so as to avoid fire and explosion.

Please do not expose the battery to moisture, or it will cause overheating, smoking and corrosion of the battery.

Please do not use or place the battery in any places with high temperature such as in direct sunlight, or it will lead to liquid leakage and overheating, and thus reducing its performance and shortening its lifespan.

Please do not charge continuously more than 24 hours.

Please store the battery in a cool, well-ventilated area without direct sunlight.

The lifespan of the battery is limited. It shortens gradually as the battery is charged frequently.

It indicates the lifespan of the battery expires when it is of no effect by several times' charging, it should be replaced with a new one in specified model.

■ **Precautions on Charger Usage**

Please do not remove or refit the charger, otherwise it will cause physical harm, electric shock, fire and damage to the charger.

Please use a 220V alternating current. Using other electric voltages will cause electrical leakage, fire and damage to your phone or the charger.

It is forbidden to make the charger short circuit, which will cause electric shock, smoking and damage to the charger.

Please do not use the charger in the condition of broken electric power line, or it will cause fire and electric shock.

Please clean up any dust accumulated on the socket duly.

Please do not put the container of water around the charger, so as to avoid the water spilling and thus causing short circuit, electrical leakage and other failures of the charger.

If the charger contacts with water or other liquid, cut off the power supply immediately to avoid short circuit, fire, electric shock and failure of the charger.

Please do not use the charger in any places with high humidity such as the bathroom, or it will cause electric shock, fire and damage to the charger.

Please do not touch the charger, the electrical wire and the socket with wet hands, or it will cause electric shock.

Do not put any weight on the electric power line or refit the electrical wire, otherwise it will cause electric shock and fire.

Please pull the plug of the charger out from the supply socket before cleaning & maintenance.

Grasp the charger while pulling the plug, as pulling the electric power line will damage the electrical wire, and thus causing electric shock and fire.

Please do not charge at the following positions: places with high temperature such as in direct sunlight; places with moisture and dust and violent vibration (where it will cause failure); near electrical appliances such as TV set, radio (where it will compromise the picture and sound).

■ **Cleaning & Maintenance**

Please do not use your phone, the battery and the charger in any places with high humidity such as in the bathroom, and at the same time avoid them being moistened by rain.

Please clean your phone, the battery and the charger with soft dry cloth.

Please do not wipe your phone with any chemical reagents, such as ethanol, diluents and benzene.

Dirty socket will cause imperfect contact or power down, so that it is impossible to charge, please clean it periodically.

2. Getting Started

■ **Installing SIM, Battery and Attaching other Accessories**

SIM Card, Memory Card & Battery Installation

Always turn off the phone and detach the charger when you insert or remove a SIM card, memory card or battery from the phone.

1. Remove the battery cover by pulling it.
2. Slide the SIM Card into its holder. Make sure that gold contacts of the SIM Card are facing down, and the cut off corner is correctly aligned.
3. Pull backward micro SD card cover. Then, put inside the micro SD card against the groove with the golden metal contact facing downwards.
4. Place the battery in the back of the phone with the label side up and the connectors facing each other.
5. Place the battery cover and push it into place.

Connecting Hands-free Kit

You are provided with a hands-free earpiece set with your phone. The same can be used to listen to your MP3 songs and listen and speak while on a call. To connect the hands-free earpiece, simply connect the connector into the connecting socket. When properly connected, the phone will display a message 'Earphone Plugged In!' with an icon displayed on top of the screen.

NOTE: Only use lemon specified accessories

Connecting the charger/Charging the Battery

1. Plug the charger's transformer into a standard AC outlet.
2. Insert the charger's output plug into the phone's connecting socket.

NOTE: The battery icon/charging icon would appear on the screen while charging.

■ Phone Keypad Layout

Left Soft Key

Performs functions in lower left display.
Enter Main menu in standby mode.

Right Soft Key

Performs functions in lower right display.
Enter Phonebook list interface in standby mode.

Dial Key

- Make calls;
- Answer calls;
- Press when idle to see the call history

End Key

End or reject calls; Press and hold this key to turn phone on/off

Direction Keys

Scroll to select options

In standby mode press to open shortcut applications

In edit message status, press to select the required word

In function menu, scroll to open desired function

OK Key

Confirm a selection.

Enter Main menu in standby mode.

0-9 Keys

In standby mode, press number keys to input dialing number. In standby mode, press and hold 1 key to enter Voicemail server, press and hold 2-9 key to directly call the number set before, in the speed dial list. In edit status, press to input numbers, characters and phonetic notation. In edit mode, except input number, press 0 key to input space. In functional menu, press numbers to speed select submenu items.

*** & # Key**

Functions vary in different situations or function menus: In edit mode, press "" to input symbols; press "#" to switch between different inputting methods. In standby mode, press and hold # key to switch between silent mode and previous mode. Press Left soft key and "#" key to lock/unlock the keypad

■ Important Phone Icons

Signal Strength Icon

The Signal Strength Icon is seen on the top leftmost corner of the screen. The icon helps you to identify the strength of the network; the phone has latched on to, at that particular instance. It has a maximum of 4 bars with a minimum as no bar. 4 bars signify strongest network strength and subsequently minimizes with each diminishing bar. No bar signifies least or no network strength

Battery Meter Icon

The Battery Meter Icon is seen on top rightmost corner of the screen. The icon signifies the battery strength available at that instance.

NOTE: At very low battery levels, the phone will prompt 'Low Battery' message on the screen

Keypad Lock Icon

The Keypad Lock Icon is seen on top of the screen at various positions depending on the number of icons displayed. A closed lock signifies that the keypad is locked. You can unlock the keypad by pressing Left soft key and "#" key on the phone. Similarly for locking the keypad, press Left soft key and "#" key

■ Basic Functions

Make a Call

To make a call, unlock the keypad, if locked, enter the desired phone number and press the Dial key.

NOTE: Your service provider programs one or more emergency phone numbers, such as 100, 101, that you can call under any circumstance, even when your phone is locked or the SIM card is not inserted. Check with your service provider, as emergency numbers vary by country. Your phone may not work in all locations, and sometimes an emergency call cannot be placed due to network, environmental or interference issues

Making a Call Using Call history

All dialed and incoming numbers are saved in call history and categorized into Missed Calls, Received Calls and Dialed Calls. To check the logs, please follow these steps:

In standby mode, press the Dial key to view Call history. Use the scroll keys to scroll among Missed Calls, Received Calls and Dialed Calls

Answering a Call

To receive an incoming call, press the left soft key to Answer the call or receive it directly by pressing the Dial key.

If headset is available, user can choose headset keys to answer the call

Call Option

The lemon D212 phone offers multiple functions during a call. During a call, the following functions can be actualized if you operate according to the instructions on the screen. Press up and down direction keys to choose the function you want and press select key to enter.

Hold single call: To hold an active call.

End single call: To end the present active call only.

New call: To make a new call.

Phonebook: To explore the Phonebook for phone numbers.

Messages: To explore Messages menu.

Call history: To view call logs.

Sound recorder: To record a conversation between the active members of the conversation.

Mute: Turn on/off the Microphone during an active call.

DTMF (Dual-tone Multi-frequency): You can choose on/off, which is to send dual-tone multi-frequency sound. This can offer dialing to the telephone numbers with extensions or IVR systems installed for menu driven options.

NOTE: This feature is network dependent.

Voice changers: Set different voice mode during the call.

3. Menu Layout

■ Phonebook

Add new contact

You can store the entry into the SIM1, SIM2 or Phone. Input name, number and other information to add the contact

Quick Search

In phonebook list interface, input the first character of the name you are searching for in the search field, and then all records meeting the conditions will be displayed.

Search results will be different due to different input methods.

Phonebook settings

In Main menu, select phonebook icon and press OK Key to view phonebook list. Press the left soft key to select Options, and go to Phonebook settings.

Using this feature you can set the following function:

- Preferred storage
- Speed dial
- My number.
- vCard version
- Extra numbers
- Memory statu
- Copy contacts
- Move contacts
- Delete all contact

■ Messages

Your phone supports various messaging services. You can create, send, receive, edit and organize text messages.

Write message

Select write message to edit short messages. Input the SMS contents by selecting preferred input method. Press # to switch different input methods; press * to input symbols. Press the left soft key to select such options as send to, save and so on.

Inbox

This folder stores all the received messages.

Outbox

This folder contains all the messages sent from your phone.

Schedule message

You can edit a message and set the date and time to send to a receiver you preset

Voicemail server: Press the left soft key to enter Options and select Edit. After completing the voicemail information, go back to the previous menu and select Call voicemail.

Common settings: Activate or Deactivate Delivery Report, Reply path and Save sent message.

Memory status: Memory status gives you the information about the storage status of the phone memory as well as the SIM memory.

- **Preferred storage:** Let you select the default storage location of the messages between Phone and SIM.
- **Signature:** Edit your signature and save it.

SMS black list

Set SMS black list status on/off, and edit the black list number.

■ Call logs

Call history

You can check all Calls or SMS related information under call history. Enter Call history and select SIM1/2 Call history. The submenus of SIM1/2 call history are as follows:

Missed calls

Dialed calls

Received calls

Delete call logs

Call timers

Call cost

Text msg. counter

GPRS counter

You can also delete call lists by selecting "Delete call log" option.

Call settings

SIM1/2 call settings

Caller ID - You can hide ID, send ID, or set by network.

Call waiting - You can activate this function or deactivate it, and can also view the current settings via query.

Call divert - You can set to divert the incoming calls in different conditions.

Call barring - In order to activate this service, it requires the services provided by the network service provider. When you change barring password, you need to input the old password.

Line switching - Switch to Line 1 or Line 2.

Closed user group (only SIM1) - Several numbers can be listed to form a user group. Use this option to specify restrictions to communication of a user group.

Advance settings

Blacklist - Set whether to activate the incoming call filter, and edit the blacklist number.

Auto redial - You can select to redial the number automatically when a call is not connected.

Auto call record - After setting this function 'on', the phone will record conversation automatically when making calls.

Call time display - After setting this function 'on', you can view the call time displayed on the screen.

Call time reminder - After setting this function to 'on', it will offer a warning tone towards the single or periodic setting as your own during the call process, so you will be reminded of the call time at periodic intervals during a call.

Auto quick end - You can set On/Off for the function, and set duration of time (1-9999 seconds).

Reject by SMS - Set On/Off to activate or deactivate the function.

Voice changers: Set different voice mode during the call.

■ Settings

Under settings, the phone gives you the option to change the settings for various features of the phone.

The following list is available in Settings:

User profiles

All the different profiles are listed under this menu:

General: The profile gives you an option to activate and customize the settings.

You can customize the following features:

Tone settings

Volume

Alert type

Ring type

Extra tone

Answer mode

Backlight settings

Meeting

Outdoor

Indoor

- **Headset**

Save Power mode

Dual SIM settings

You have following options listed under Dual SIM settings:

Dual SIM open: This option activates both the SIM cards.

Only SIM1 open: This option activates only SIM1.

Only SIM2 open: This option activates only SIM2.

Flight mode: This option disables all RF communication for both SIM1 and SIM2, however, enables you to use other features/functions of the phone.

Phone settings

You have following options listed under phone settings:

Time and Date: Let you set home city, time and date on the phone.

Schedule power on/off: Let you set a particular time on the phone when the phone should power on/off itself.

Language: lemon D212 currently supports Hindi and English languages.

Preferred input methods: This enables you to select the text input method: They are – Smart ABC/abc, Multitap ABC/abc, Numeric, Smart Hindi and Hindi input.

- **Display:** You can set a host of different characteristics of the phone such as wallpaper, screen saver, power on/off display, show date and time, etc.

- **Greeting text:** Let you set your own greeting message when you power on the phone.

- **Dedicated key:** It helps you dedicate/map certain key features of Direction keys (UP/DOWN/LEFT/RIGHT) of the phone. At anytime you can change the mapping and select a new feature from the list of features available.

- **Auto update of date and time:** This feature automatically updates the date and time on the phone, receiving it from the network.

NOTE: This feature is network dependant.

Network settings

This option allows the user to select a desired network and addition of a new network to the network list. The network setup gives you the following options:

- **SIM1/2 Network settings**

- **Network selection**

- **Preferences**

Security settings

Under Security settings, we have the following options available:

- **SIM1/2 Security settings**
- **SIM1/2 lock:** Press OK key to enable PIN lock, which will require you to input a password when the mobile phone is switched on. Otherwise, the SIM card is unavailable.
During setup, it requires to enter the correct PIN code. If a wrong code is entered for three times, the PUK (Personal Unlock code) will be required, PUK is used to unlock and change the locked PIN code. If PUK code is not provided, please contact your local network service provider.
- **Fixed dial:** Outgoing calls from your phone can be restricted by making a fixed dialing list that allows only numbers on that list to be dialed from the phone.
- **Barred dial:** Barred Dialing is a SIM card/Network dependant feature. If your operator supports it, then you can use the facility in the phone.
- **Change password:** It gives you the options to change PIN, PIN2 password.
- **Mobile tracker:** If you lose your phone, this function may probably help you to get back your phone.
 1. First you should insert SIM card.
 2. Enter Settings → Security Settings → SIM1 security settings → Mobile tracker.
 3. Enter the password (The default password is **0000**, same as Phone lock password).
 4. Set Status "ON".
 5. Enter "Receive stolen SMS number". You can add two numbers. For example, add number 919717987880 and 919971234567, where "91" is the country code
 6. Finish.
 7. Power off. Pull off the SIM card, and insert other SIM card. (If you set SIM1 Security, you will pull off the SIM1 and insert another SIM1).
 8. Power on. The handset will send a message to the numbers (You enter the numbers in "Receive stolen SMS number"). You will know which number is using your handset. If you insert former SIM card, the handset will not send the message.
- **Phone Lock:** This function protects your phone from any unauthorized usage or unauthorized access to information stored in the phone. When phone lock is activated, the phone would ask for the phone lock code every time you power-on the phone. Enter the lock code (default as **0000**) to use the phone. You can simply unlock the phone by going into security settings > Phone Lock > enter the password and put it off.
- **Auto keypad Lock:** The phone will lock the keypad after a preset time interval. You can set the time from 5 seconds to 5 minutes.
- **Privacy Settings:** By inputting the password (default as **1234**), you can protect your Phonebook, Call history, SMS, MMS and File manager data.
- **Change Password:** You can change phone lock password and protect privacy password.

Connectivity

You can view Data account in this function. Press the left soft key to select Options, and you can add, edit or delete GPRS account.

NOTE: Select the appropriate setting from the list for using a particular feature depending on the availability of the operator services.

Restore factory settings

Selecting this option will ask you to enter the password to restore the phone to factory settings. The default password is set as **0000**.

Shortcuts

Assign shortcuts as per your requirements to specific keys.

■ Multimedia

This phone comes with a host of multimedia applications, providing you with unlimited entertainment.

Games

Image viewer

It stores all pictures which are preloaded by user. It gives you the following options.

- **View:** View the selected file.
- **Browse style:** Display images in List style or Matrix style.
- **Send:** The images selected can be sent via MMS.
- **Use as:** The image selected can be set as wallpaper, screen saver, power on/off display and caller picture (provided the image size is not more than 20K).
- **Rename:** You can rename the image according to your own choice.
- **Delete:** To delete the selected file.
- **Sort by:** The images stored can be sorted by Name, Type, Time and Size.
- **Delete all files**
- **Storage:** You can set the photos default storage path to phone or memory card.

Video player

Lemon D212 comes with an inbuilt video player that plays all your favorite videos stored in memory card.

Audio player

Lemon D212 comes with an inbuilt audio player that plays all your favorite songs. It gives you a host of setting options to make your listening experience interesting.

In list interface, press the left soft key to enter Options. You can operate the following options: Play, Details, Add to ringtones, Refresh list and settings.

The Setting option has following submenus:

Pre. Playlist – It gives you an option to select your play list source (Phone or Memory card).

List auto gen. – It also offers to generate the play list automatically.

Repeat – You can also select to repeat the song or complete play list (Off/One/All).

Shuffle – You can shuffle the order of your songs to play. If you set the status to 'On', the songs will be played in a random mode. Otherwise, a sequential pattern will be followed.

Background play – Background play option allows you to enjoy your music even if the player is minimized to use other functions of the phone.

Sound recorder

You can record sound/voice on your lemon D212 phone. Just select sound recorder, go to Options and press New record. Select Stop to save it. Select 'pause' to pause the recording and 'continue' to resume the recording.

FM radio

Lemon D212 comes with an in-built FM Radio Receiver/Recorder Player. Press Option to find:

Channel list: Store all the channels that the FM Radio can receive. You get options to play or edit them.

Manual input: You can input a channel frequency and play it by pressing OK key.

Auto search: On selecting this function, the FM radio will scan all available channels provided by the network. To start the search, make sure that the radio is power on.

Settings: Under settings, you have options for Background play, Loudspeaker, Record format, Audio quality and Record storage.

Record: You can record your favorite music or program.

Append: Append recording enables you to append records, if any.

File list: Select File list to check your previously stored recording files.

The FM radio also gives you an option to change the settings through shortcut keys available on the main window. Skip to next channel or previous channel by using Left and Right direction keys; adjust volume by using Up and Down direction keys.

Schedule FM recording

This feature enables you to schedule the radio to power on itself and record your favorite program. You can set time, date, repeat mode, channel settings and record settings to record the desired program. It can record 4 programs for you to enjoy them anytime later at your own wish.

■ **File manager**

As the name suggests, File manager allows you to manage all the files stored in the phone and the memory card.

You can view the remaining memory and available memory of phone and memory card.

1. You can open and navigate the directories and files in the storage.
2. You can View, Play and Setup files in the storage disks.

The options available are:

Open

Images

Audio

New folder

You can create a new folder to store files.

Format

NOTE: Formatting the phone or Memory card will erase all existing data from them.

■ **Organizer**

Calendar

You can use the calendar to keep track of important meetings. After entering the calendar function menu you can select year, month and date using direction keys. On a selected date you can select to view:

View: If there is a special background color on a date it means there is some event on that day. You can also view any Note/Remark mentioned by you for an event stored by you previously.

- **View all:** View all events.

Add event: When you add a new event, you can set event duration time, add subject, set alarms on/off.

- **Delete event:** Delete the selected event.

Jump to date: Input a date, and press OK key to go to the specific date for entry/edit/viewing of task.

Indian calendar

Onscreen prompts

Tasks

You can add new tasks, and view, edit, delete them in Tasks.

Alarm

The Alarm can be set to ring at a specific time on several days. There are five different default alarms. You can set these alarms to wake you up at different time on specific day(s) of a week.

World clock

World clock can be used to know the time in various cities across the world. You can see a world map and immediate time in those cities using world clock. Enter world clock to view a particular city's time by using the direction keys.

Notes

You can press the left soft key to add a note. Also, you can view, edit or delete the note you selected.

Calculator

Keep your calculations on your finger tips with the calculator

Unit converter

Use this feature for the converted units of weight, length.

Currency converter

Use this feature for the exchange rate conversion.

■ Services

STK

STK stands for SIM Tool Kit. This service is provided by the network provider and is used to initiate various Value Added Services, provided the SIM and the operator support this feature.

Internet service

WAP or Wireless Application Protocol browser provides all the basic services of a computer based web browser but is simplified to operate within the restrictions of a mobile phone. The WAP Browser has the following options:

- **Homepage:** It allows you to enter the default URL on the phone. This will enable you to go to the same page every time you access the homepage.
- **Bookmarks:** It enables you to mark a place in an electronic document or a pointer (primarily to an internet URL) in an Internet web browser.
- **Recent pages:** It stores the list of URLs which have been recently visited by you on the WAP browser.
- **Input address:** Input the desired address (URL) of the website or webpage.
- **Service inbox:** It receives and stores URLs through text messages from the operator. You can read them and accept to go to the web page and browse.
- **Settings:** You can vary the following settings:
 - **Select SIM**
 - **Profiles**
 - **Browser options**
 - **Service message settings**
 - **Clear cache**

○ **Clear cookies**

■ **Lemon Twist**

This function depends on network. If the network service is available, you can enjoy Twitter, MSN, Yahoo and so on

GPRS SETTINGS FLOW CHART:

First select Menu option

1. Then go to Services.

2. Select Internet Service.

3. Select Settings Option.

4. Select Profiles, then select SIM (SIM1 or SIM2)

5. Select the operator service you want (For ex we have AIRTELGPRS activated SIM) select Airtel GPRS

6. Then select Activate option.

NOTE: In case your service provider is not there in the given list, you can add your profile by selecting "Add new" option.

7. Select Add new option.

8. Make the necessary changes according to excel sheet provided for different operator services.

9. Select Activate option. (for eg. If we don't have the AIRCEL operator service in the given list, then select ADD NEW option. Edit the profile page as per the excel sheet given for GPRS and MMS settings and make the necessary changes.)

NOTE: GPRS MUST BE ACTIVATED ON THE SIM. FOR THIS CONTACT THE OPERATOR.

GPRS SETTINGS

Select Menu→ Go to Services→ Internet Services→ Settings→ Profiles→ Select SIM (SIM1 or SIM2) → Select operator service (eg. Airtel Gprs) → Activate.

NOTE: In case your service provider is not there in the given list, you can add your profile by selecting “Add new” option and then make the changes according to the excel sheet provided for MMS and GPRS Settings.

MMS SETTINGS: -

First go to MENU

1. Go to Message option. Select MMS

2. Select MMS Settings

3. Select Profiles

4. Select the operator service you want.

(For eg. we have AIRTEL GPRS activated SIM)

5. Select Activate option.

MMS SETTINGS

Select Menu→ Go to Messages→ MMS→ MMS Settings→ Profiles→ Select SIM (SIM1 or SIM2) → Select operator service (eg. Airtel GPRS) → Activate
