Maintain and Care

Caring for Battery

This phone uses a rechargeable battery as power source, when the charge is weak, recharge immediately to protect the battery life. It is best to drain the battery charge first.

When not using the charger, unplug it from the power source and the phone. Over charging will shorten the battery life. Not leave the charger connected to the unit or battery for more than a week.

Temperature affects battery charge capacity. Your battery may need to be warm up or cool down before charging. If the battery temperature is lower than 0°C and higher than + 45°C., it will not recharge.

Use the battery as it is originally intended. Do not short circuit the battery by connecting the positive and negative terminals with a conductor.

Do not use a damaged battery

The battery will not perform properly and its life will be shortened if exposed to extreme temperatures.

Do not place the battery in fire; follow local laws and ordinances in disposing used battery.

Maintenance

Do not leave your phone within the reach of small children (certain removable parts may be accidentally ingested).

Do not use your phone in damp areas (bathroom, swimming pool...). Protect it from liquids and other moisture.

Do not expose your phone to extreme temperatures lower than - 10°C and higher than + 55°C.
